

BRITISH INVENTIONS

-We are going to present about James Watt and his steam engine, Alexander Graham Bell and the telephone as well as Isaac Newton and his discoveries

Isaac Newton

- A polymath active as a mathematician, physicist, astronomer, alchemist, theologian, author, and inventor

- Graduated from Cambridge University

- Ba – 1665
- Ma – 1668

- Newton's laws of motion are three physical laws that describe the relationship between the motion of an object and the forces acting on it. These laws, which provide the basis for Newtonian mechanics

- The discovery of gravity unified the universe under one law that provided the foundation for modern science and advanced technology

- Theory of colour based on the observation that a prism separates white light into the colours of the visible spectrum.

- He also received the title of a knight in 1705 granted by queen Anna

Harrier jump jet

- Commissioned by the Royal Navy to save space on British aircraft carriers

- Developed by Hawker Siddeley

- A jet also used by the US marine corps

- UK retired all of their Harriers by 2011

Summarization

- As for the summarization I would like to remind you that the UK was the leader in innovation and technology development between the 16.th and the beginning of the 20.th century
